

Getting productions back to business

Who we are:

Naomi Dabby

Undergrad: UC Berkeley, BS Chemistry, BA Molecular Cell Biology, Genetics

Medical School: USC Keck School of Medicine, Doctor of Medicine

Internship: Harbor-UCLA Medical Center

Residency: Albert Einstein College of Medicine Emergency Medicine Residency at Jacobi/Montefiore Medical Centers

Certification: American Board of Emergency Medicine

Contact: naomi@modmd.org

Lisa Dabby

Undergrad: UC Berkeley, BA in Molecular & Cell Biology

Medical School: University of California, San Francisco, School of Medicine Doctor of Medicine with Thesis

Internship & Residency: Harbor-UCLA Medical Center

Certifications: American Board of Emergency Medicine

Contact: lisa@modmd.org

Who we are (cont.):

- We are **board certified** emergency medicine doctors with over **20 years** of experience each.
- **Dr. Lisa Dabby** is a recognized expert, featured in the LA Times, LA Magazine, and on CNN
- **Dr. Naomi Dabby** has been caring for critical covid patients in the Covid Surge Hospital ICU
- We are taking care of **covid** patients in the emergency room
- We have **consulted** for an independent production
- We have created **modMD** to bring **excellent care** and **safety** to your production site.

What modMD offers productions:

Large volume rapid
Covid-19 testing on site

Education & safety
protocols for staff

Qualified Safety
monitor on location

What modMD offers productions:

Testing:

We are HIPAA compliant

We can run up to **400 tests** per day at the site of your business with a turnaround time of **24 hours**.

Education & Safety Protocols

Our goal is to help your production get back to work safely.

- We help create safety protocols for your production
- We can tailor individual guidance to each crew member's role (ex camera man, lighting, make-up, and talent) to improve their safety.
- We can provide training to all employees regarding covid, protective equipment, hygiene, and best safety practices
- Specialized counseling for high risk employees
- Qualified safety monitor on-site

Our Staff:

We use registered nurses who are experienced in administering Covid-19 tests and will be wearing full medical grade personal protective equipment.

We have a safe practice checklist to keep you and your employees protected during the testing.

Testing Logistics

We can offer full-service logistic planning for your company's testing procedure:

- Scout proposed testing site to ensure proper set-up and safety
- Provide tents and infrastructure for outdoor test sites
- Offer custom scheduling software to efficiently process testing for large groups
- Intake and processing administration staff
- Cleaning and sanitization crew

These services can be customized to accommodate your test site and group needs.

How **HollPass** keeps productions safe + private

1

HollPass™ daily SMS symptoms tracker, using cryptographic privacy eco-system, interoperable with vendors, labs, doctors, employees

2

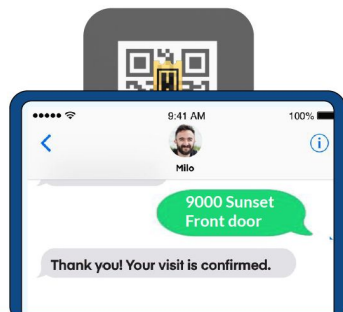

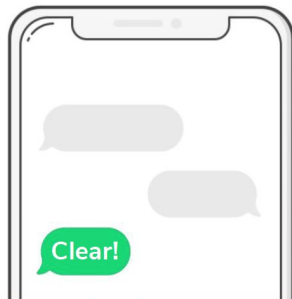

Testing (incl antibodies). On-site sample collection and maintenance throughout production

3

Non-invasive SMS-based contact tracing with A.I. optimization. Work with each production to map out movements and buildings, create QR 'keys'

HollPass Instant and Easy

**Daily
CheckUp**

**9000 Sunset
Location
Check-in**

HollPass
Hollywood Back to Work

01

Clear the Herd

Enrollment begins. Notification is provided on when/where testing is provided. Once tested, crew member will remain isolated for a minimum of ten days in advance of starting production. Testing is ordered by physicians, administered by medics/nurses, samples anonymized, tested by CLIA/CAP labs under approved EUA.

02

Track/Trace

Monitoring the herd while in isolation to determine if subsequent testing is needed (QR code option is available for tracking only when at the production site). Results will be sent by lab back to Physician who will then populate the HollPass system.

03

Start of Production

Production coordinator will verify that all individuals have been enrolled, remained 'safe' and test results are negative. On-site medic will administer a temperature check. Crew members not cleared for work will be referred back to the physician assigned by HollPass for further evaluation.

04

Monitoring

Production coordinator using the HollPass dashboard will monitor crew through-out the project. Production Coordinator will provide the HollPass AI information regarding unique situations related to the project ie: ventilation, confinement in close quarters, etc. AI will then make recommendations if further testing is required.

05

Maintenance

Production coordinator will be responsible for coordinating daily temp checks (administered by medic/nurse) and that the individual has answered the daily questionnaire (part of the HollPass app).

Vendors

Vendors/Suppliers to the production are provided a no charge version of HollPass that provides the enrollment and daily questionnaire.

Thank you
